Timeliner is another jQuery plugin for creating an fully accessible, interactive, printer friendly and responsive timeline that's able to handle nearly any form of Html content.

Features:

- Simple and easy to implement.
- [Responsive](#) design for mobile devices.
- Multiple timelines on one page.
- Expandable/collapsible timeline items.
- Auto start and auto load support.

How to use it:

1. Include jQuery library and jQuery timeliner plugin at the end of the document.

```
1 <script src="http://ajax.googleapis.com/ajax/libs/jquery/1.11.0/jquery.min.js"></script>
2 <script type="text/javascript" src="js/timeliner.min.js"></script>
```

2. Include optional jQuery colorbox for image lightbox support.

```
1 <link rel="stylesheet" href="inc/colorbox.css" type="text/css" media="screen">
2 <script type="text/javascript" src="inc/colorbox.js"></script>
```

3. Include required CSS files in the head section of the document.

```
1 <link rel="stylesheet" href="css/screen.css" type="text/css" media="screen">
2 <link rel="stylesheet" href="css/responsive.css" type="text/css" media="screen">
```

4. Create the content for the timeline following the Html structure:

```
01 <div id="timelineContainer" class="timelineContainer">
02
03 <div class="timelineToggle">
04 <p><a class="expandAll">+ expand all</a></p>
05 </div>
06 <br class="clear">
07
08 <div class="timelineMajor">
09 <h2 class="timelineMajorMarker">Major Marker</h2>
10 <dl class="timelineMinor">
11 <dt id="event01"><a>Event</a></dt>
12 <dd class="timelineEvent" id="event01EX" style="display: none; ">
13 <p>Content about the event goes here.</p>
14 </dd>
```

```

15 </dl>
16 <dl class="timelineMinor">
17 <dt id="event02"><a>Another Event</a></dt>
18 <dd class="timelineEvent" id="event02EX" style="display: none; ">
19 <p>Content about the other event.</p>
20 </dd>
21 </dl>
22 </div>
23
24 ...
25
26 </div>

```

5. Initialize the timeline.

```

1 <script>
2 $(document).ready(function() {
3   $.timeliner();
4 });
5 </script>

```

6. Available APIs.

```

01 <script>
02 $(document).ready(function() {
03   $.timeliner({
04     timelineContainer: '#timelineContainer',
05     // value: selector of the main element holding the timeline's content, default to #timelineContainer
06     startState: 'closed',
07     // value: closed | open, default to closed; determines whether the timeline is initially collapsed or fully expanded
08     startOpen: [], // value: array of IDs of single timelineEvents, default to empty; determines the minor event that you want to display open by default on page load
09     baseSpeed: 200, // value: any integer, default to 200; determines the base speed, some animations are a multiple (4x) of the base speed
10     speed: 4, // value: numeric, default to 4; a multiplier applied to the base speed that sets the speed at which an event's contents are displayed and hidden
11     fontOpen: '1.2em',
12     // value: any valid CSS font-size value, defaults to 1em; sets the font size of an event after it is opened
13     fontClosed: '1em',

```

```
11 // value: any valid CSS font-size value, defaults to 1em; sets the font size of an event after
12 it is closed
13 expandAllText: '+ expand all', // value: string; defaults to '+ expand all'
14 collapseAllText: '- collapse all' // value: string; defaults to '- collapse all'
15 });
16 });
17 </script>
```

Change log:

2016-05-19

- Add clearfix to css

2016-05-14

- Fixed: Clicking on title at open timeline content, title gets bigger, closing follows on second click

2014-10-14

- Fixed youtube refs

2014-10-13

- Bug fixes

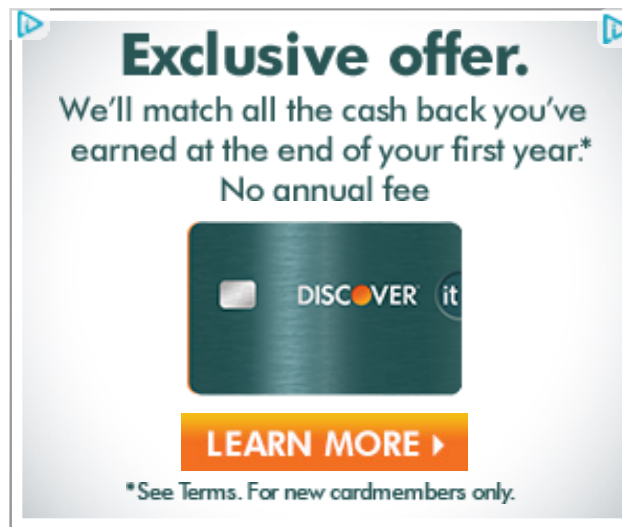

2014-10-12

- First version of [Future theme demo](#);
- Added [Venobox](#) modal plugin (to replace Colorbox)

2014-10-11

- Separated demo and plugin css; added minified plugin css;
- Revised semantic naming defaults; added additional tag/class customizations;
